

# Global Training Program

Aerospace Coatings

Aerospace Customer Training

Join the hundreds of customers from the aerospace industry who are trained every year by AkzoNobel!

**When it comes to air travel, our market-leading products and technologies offer world-class functionality, performance, efficiency and value. As a dedicated industry partner, we provide global support and offer a wide range of solutions for manufacturers, airlines, MROs, and applicators.**

Partnering with our customers and distributors is at the heart of what we do. We promote and strengthen these partnerships by offering Global Training Programs to our industry partners.

Our training programs offer professionals around the world to deepen their knowledge of paints and coatings and enhance their Aerospace Coatings product and industry expertise. By attending our trainings, our partners can make informed choices about Aerospace Coatings and also give valuable feedback to help us develop innovative products.

AkzoNobel have gone above and beyond my expectations to make this training effective and memorable. The presenters were very professional and able to answer our technical questions well.

### Training Programs

AkzoNobel offers two training concepts: Training School and customer-specific trainings.

Our Training Schools are located at our Aerospace sites in Troy, Michigan and Sassenheim, The Netherlands. Focused on meeting the needs of the attendees, the curriculum is designed to be flexible to ensure it is tailored to the needs and technical expertise of the delegates.

AkzoNobel also conducts customer-specific trainings all over the world. These trainings are held at AkzoNobel sites or customer locations around the globe.

I found that the training course offered valuable knowledge for my day-to-day working life. Thank you!

### Training School Curriculum

The curriculum is based on giving participants a broad understanding of the paint-making process, from start to finish. With practical application sessions and facility tours, the program assures a comprehensive experience for anyone involved in the use or procurement of aerospace coatings.

Suitable for newcomers to Aerospace Coatings or those looking to refresh their knowledge, the Training School may cover various topics, tailored to the attendees:

- Basic aerospace coatings principles
- Composition of paint and paint production
- Health, Safety, and Environment
- Color and Quality Control
- Preparation and application methods
- Industry and regulatory changes
- Innovation and new product development
- Networking and discussion with other attendees

## Key Benefits for Attendees

- Deepen your knowledge of the principles of aerospace paints and coatings
- Be able to make informed choices about what products to buy and use
- Understand how to reduce process times and costs
- Learn to manage your coating process for maximum efficiency
- Understand the impact of changes in the market and regulatory environment
- Network and share experiences with other attendees
- Contribute input to develop innovative products
